

## HOMMEL+KELLER PRÄZISIONSWERKZEUGE GMBH

Almost 100 years, we at Hommel+Keller have been constantly improving and developing new products. We have made a name for ourselves in the world of knurling technology and are known for our high-quality marking, bur-nishing and gear cutting tools. Our aim is to deliver products that do exactly what our customers need, with a quality and precision that demonstrate our experience and commitment to the industry. We make it a priority to listen to our customers and give them good advice. We're with them every step of the way, from development to aftersales.

Our brands represent a long tradition of listening and adapting to the needs of our customers. We maintain a close relationship with our distributors in over 39 countries and with well over 5,000 tools in stock, we can ship to our customers on the same day. We create solutions that not only meet, but exceed the demands of today's manufacturing industry.

HOMMEL+KELLER  
PRECISE. RELIABLE. INNOVATIVE.

SIMPLE.  
PRECISE.  
FLEXIBLE.

The manufacture of high-quality and durable products often requires customized tool designs. Here we would like to show you the added value we can offer you. Because we are specialists when it comes to unusual applications!

Simply let us know your specific requirements and we will design the ideal tool for your project.

## KNURLING

### Global market leader

Hommel+Keller Präzisionswerkzeuge GmbH stands for over 90 years of experience in knurling technology. Our knurling technology has been unrivaled world-wide for decades, and you can feel it, too.

## DIAMOND BURNISHING

### Min. time for max. tool life

Extremely smooth surfaces less than  $R_z 1 \mu m$  without a separate work step or equipment, easy to use and applicable on almost any lathe.

### The most modern technology

Years of further development combined with state-of-the-art technology make our gear and form cutters reliable top performers.

## GEAR CUTTING

## MARKING WITH STAMPING

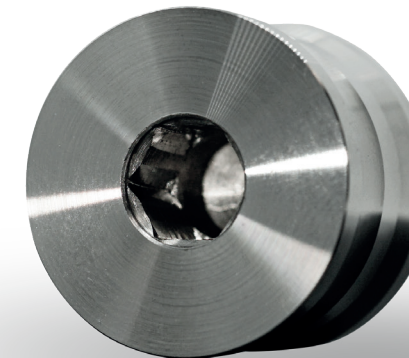

### Individual & fast

The ultimate all-rounder in marking technology. Mark in seconds, can be customized, absolutely precise and can also be used on almost any lathe.

## BROACHING

### Complex but precise

Efficient solutions for complex internal and external profiles with absolute precision. Economical production in just one operation.
